Sustainability that fits you

## WHY DOES SUSTAINABLE FASHION MATTER?

Sustainable fashion saves natural resources.

Our landfills sites are filling up by waste.

It is time to protect our planet earth.

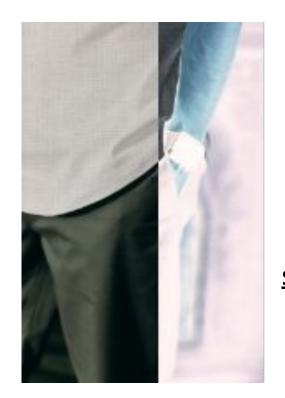

97% of what goes into making clothes are new resources

3% of it being recycled materials

98 million tons including oil to
produce synthetic
fibres, fertilisers to
grow cotton and an
endless list of
chemicals needed to
dye & finish fabric.

Why not, use that leftover fabric and save us the waste and extra producing cost of fabric production.

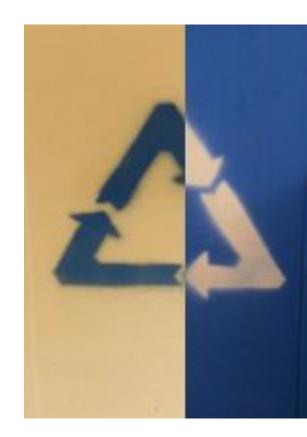

eco-Mode saves tons of oil and co2 by recycling waste fabrics and giving them a new life, sustainability that fits you

ECO-MODE focuses on sustainable fashion and recycled fabrics.

Each and every product is unique due to the fabrics.

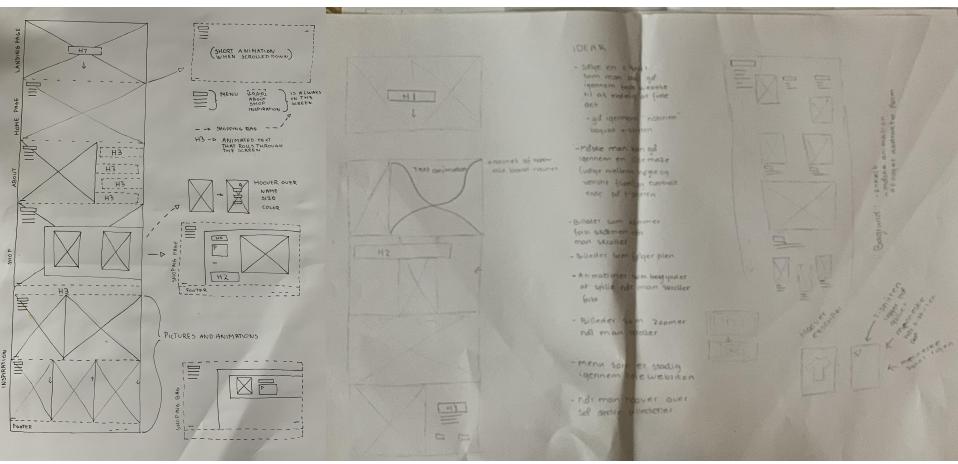

given a new life

<u>eco-friendly</u>

not harming the environment

everyone who wants to wear unique t-shirt and cares about our planet earth
